

Software Developer | Full Stack

EXPERIENCE

Elan Pure – Full Stack Web Developer (Commercial Project / Freelance)

February 2026 – July 2026

Led the end-to-end design, architecture, and development of a custom e-commerce web platform for a real-world company, managing the full lifecycle from business requirements gathering to cloud production deployment. Designed the relational database schema and backend services to ensure transactional integrity across users, catalogs, and orders, while building a centralized admin dashboard for complete system management, real-time inventory tracking, and stock synchronization. Integrated an analytics module leveraging an AI API for sales forecasting and demand trend analysis based on historical data, and managed continuous cloud deployment on Render to guarantee high availability, secure RESTful endpoints, and optimized response times.

Technologies: React, FastAPI / Node.js, PostgreSQL / MySQL, RESTful APIs, AI APIs, Render, Git.

PROJECTS

2D Roguelite / Beat 'em Up Video Game (In Development)

May 2026 – Present

Gameplay & Logic Developer | Unity & C#

Designed and implemented from scratch the core code architecture and gameplay logic for a 2D top-down video game, combining real-time beat 'em up combat mechanics with roguelite progression systems in Unity Engine. Developed enemy AI behaviors using Finite State Machines (FSM), wave spawning and entity management algorithms, as well as character stat progression, abilities, and collision systems. Applied Object-Oriented Programming (OOP) principles and design patterns in C# to optimize game loop performance, resource management, and on-screen

TOMAS BASTO URIBE

PROFILE

Associate Degree graduate in Computer Systems Development with a solid background in Full Stack web development, backend architecture, databases, and Object-Oriented Programming in C# and Python/JavaScript. Proven experience designing scalable e-commerce applications, administrative dashboards with inventory management, AI API integrations for sales forecasting, and 2D video game architectures in Unity. Advanced English proficiency (B2+/C1, TOEFL iBT candidate) and intermediate French (B1). Focused on writing clean code, applying design patterns, and delivering efficient software solutions that add value to development teams.

EDUCATION

Unidades Tecnológicas de Santander (UTS) Associate Degree in Computer Systems Development (Tecnología en Sistemas)

August 2023 – July 2026

Status: 100% of academic credits and degree thesis project completed & approved (Degree issuance in progress).
Notable Cumulative GPA: 4.0 / 5.0

CERTIFICATIONS

AWS Academy Graduate - Cloud Foundations (Cloud Architecture, Infrastructure & AWS Services)

Amazon Web Services (Credly), June 2026

AWS Academy Graduate - Machine Learning Foundations (ML Models, Pipelines & AI Services)

Amazon Web Services (Credly), June 2026

Complete Web Development: HTML, CSS, JavaScript, PHP & MySQL

Udemy (82.5 hours), March 2023

frame rates with multiple active entities.

Technologies: Unity Engine, C#, Object-Oriented Programming (OOP), Finite State Machines (FSM), Git.

Mobile App with Cloud Integration & External Services

Backend & Mobile Developer | Flutter, Node.js & Firebase

Designed and built an integrated mobile solution featuring a Flutter frontend and a Node.js middleware server deployed on Render. Handled user authentication and data persistence using Firebase (NoSQL), and developed secure backend intermediation logic to consume and process external API requests efficiently prior to client delivery.

Technologies: Flutter, Node.js, Express, Firebase (NoSQL), RESTful APIs, Render.

SKILLS & COMPETENCIES

- Languages: C#, JavaScript / TypeScript, Python, Java, C++, SQL, HTML5/CSS3.
- Frontend & Backend: React, Node.js, FastAPI, RESTful APIs, AI API Consumption & Integration.
- Databases: PostgreSQL, MySQL, Firebase (NoSQL), Relational Data Modeling & Query Optimization.
- Tools & Cloud: Unity Engine (C# Logic), Git, GitHub, Render, AWS (Core Services), Linux.
- Methodologies & Practices: Scrum, Object-Oriented Programming (OOP), Layered Architecture.

LANGUAGES

- Spanish: Native
- English: Advanced / B2+ (TOEFL iBT candidate presenting this month)
- French: Intermediate / B1
